

## **Memorials**

Memorials must be made of marble, granite or cast bronze, and they must be set on a concrete foundation that complies with city standards. Both upright and flush monuments are acceptable. No memorial may be installed until the site has been located and marked by the city and a Memorial Placement Permit has been issued. The memorial contractor is responsible for work cleanup and any damage caused during installation. Maintenance and upkeep of a memorial is the responsibility of the owner and heirs. The City reserves the right to remove any memorials that become dilapidated, unsightly or dangerous.
